

*Q: What size acreage are you interested in?*

A: There are no size limitations to what we will purchase. Fill in the form and we will discuss your personal situation.

*Q: What will you do with the land you are acquiring?*

A: We will begin by growing crops in the fall. We are acquiring farm equipment at present and will be planting soon.

*Q: If you buy up all my neighbours land how will I be affected?*

A: There is not pressure on you to sell to us. It would be nice if our holdings are consolidated but we expect to take our time acquiring land. Your land value will probably not diminish or increase in value because we are buying.

*Q: What crops will you be growing?*

A: Using best practices in our determination of the types of crops we will be growing hardy crops on a rotating basis.

*Q: What's the timeline for sustainable biodiesel?*

A: We may or may not use the crops for biodiesel.

*Q: Will you be setting up biodiesel production plants in my backyard?*

A: There is no plan to put production facilities on good farmland

*Q: Are we going to see oil wells popping up all over?*

A: There is absolutely no plans to drill for oil.

*Q: Do you practice environmentally friendly practices?*

A: Wherever possible we will use sustainable energy and do our best to work with protecting the environment

*Q: Is Torch River Farms a big international conglomerate?*

A: We are owned and managed by a couple of local born and bred guys who decided one day to buy back a lost homestead and thought it might be a good idea to keep going. We are a privately held company at present

*Q: Can I invest in Saskatchewan's future and your company?*

A: If you wish to be informed of any investment opportunities should we go public please contact the President

**“We’re not in the real estate business  
we are in the farming business”**

**Bob Munro, President**

*Q: Tell me about the Stay on My Land option?*

A: If you sell us your land and you have substantial holding (section or more) we will allow you to live on a portion of the land until we need it.

*Q: Do you have any ulterior motives for buying the properties?*

A: We are farmers and plan to grow crops. We may utilize the crops for other sustainable purposes like biodiesel production down the road.
